DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 11/14/2005 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of 09/6,553,063 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

- 2. Applicant's arguments, see Terminal Disclaimer filed 11/14/2005 with respect to the rejection(s) of claim(s) 1, 2, 3, 11-18, 47, 49-53 are rejected under 35 U.S.C. 102(b) and Double Patenting of claims 1-54 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
- 3. Applicant's arguments filed 11/14/2005 have been fully considered but they are not persuasive. Applicant recites that Williams does not disclose "wherein the selectable predetermined integer number of data bits is one of k bits and k+1 bits, where k is an integer number of data bits". However examiner asserts that Williams in fact discloses "wherein the selectable predetermined integer number of data bits is one of k bits and k+1 bits, where k is an integer number of data bits" (col. 3, lines 4-65), which is encompassed by the recitation in Claim 49 of "symbol being composed of a selectable integer number of data bit vectors, each of the data bit vectors being composed of a

selectable predetermined integer number of the data bits", already recited in claim 49 previously.

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1-6 contain handwritten elements. Applicant is advised to employ the services of a competent patent draftsperson outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 6. Claim 49 is rejected under 35 U.S.C. 102(b) as being anticipated by Williams (5,598,435) (cited previously).

With regard to claim 49, Williams further discloses A communication system communicating data bits through a data channel, comprising: a data transformer coupled with the data channel, the data transformer transforming the data bits into a transmission symbol, the transmission symbol being composed of a selectable integer

number of data bit vectors, each of the data bit vectors being composed of a selectable predetermined integer number of the data bits (col. 3, lines 1-67), the data transformer mapping a selectable number of transmission symbols into a data symbol selected from a signal constellation, the signal-constellation being one of an integer signal constellation and a power-of-two signal constellation, the selectable predetermined integer number of data bits being selected to provide a preselected average data bit transmission rate (col. 1, lines 58-67, col. 2, lines 40-46, col. 4, lines 24-44), wherein the selectable predetermined integer number of data bits is one of k bits and k+1 bits, where k is an integer number of data bits (col. 3, lines4-65).

Allowable Subject Matter

6. Claims 50-51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The instant application discloses a communication device for communicating data through a data channel. Prior art references show similar methods but fail to teach: "a controller coupled between the data channel and the data transformer, the controller sensing at least one data channel condition and compelling the data transformer to select one of the selectable integer number of data bit vectors and the selectable predetermined integer number of the data bits, responsive thereto", as in claim 50; "wherein the

selectable predetermined number integer number of data bits is adaptively selected", as in claim 51.

- 7. Claims 1, 2, 5-46, 48, 54 are allowed.
- The following is a statement of reasons for the indication of allowable subject 8. matter: The instant application discloses a communication device for communicating data through a data channel. Prior art references show similar methods but fail to teach: "wherein the data transformer, responsive to the controller, reversibly groups ones of the first predetermined integer number of data bits into selected ones of the selectable integer plurality of data bit vectors and ones of the second predetermined integer number of data bits into selected others of the selectable integer plurality of data bit vectors in the response to the data channel condition, the selectable integer plurality of data bit vectors forming at least one data symbol corresponding to a predetermined pattern being representative of a preselected signal constellation", as in claim 1; "forming ones of a first selectable predetermined integer number of data bits into selected ones of a selectable integer plurality of data bit vectors, (2) forming ones of a second selectable predetermined integer number of data bits into selected others of the selectable integer plurality of data bit vectors", as in claim 48; "maximum-likelihood sequence estimation receiver selects a path through a code trellis having a substantially minimum noise-power-inversely-weighted-squared-Euclidean distance", as in claim 54.

Conclusion

9. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
